# Smart Graphics 2014

[www.smartgraphics.org/sg14/](http://www.smartgraphics.org/sg14/)

27-29 August 2014  
Taipei, Taiwan

## Call for Papers

Smart Graphics 2014 welcomes submissions from researchers and practitioners, as well as graphic artists and graphic designers interested in an interdisciplinary approach to the design of smart interactive visual, auditory, and haptic displays.

We specially encourage young researchers to submit their ideas and results.

In 2014, we propose a specific emphasis on the integration of scientific research into the design of intelligent, interactive, and context-aware digital media applications. In particular, we encourage discussion of research that pertains to interactions within the everyday world, using smart graphics and responsive media to enrich and augment experiences, culture, leisure, and work.

Topics of interest include (but are not restricted to):

computer graphics  
artificial intelligence  
cognitive science  
scene perception  
graphical abstraction  
graphics design  
virtual and mixed reality  
entertainment computing  
computational aesthetics  
information visualization  
visual analytics  
multimodal interfaces

context-aware interfaces  
non-desktop interfaces  
surface computing  
sketch-based interfaces  
interaction design  
user experience  
user Interaction  
interactive narratives  
human-computer interaction  
interaction science  
user studies  
technological art

## Important Dates

*March 15, 2014*

*May 31, 2014*

*June 15, 2014*

*August 27-29, 2014*

Submissions due

Notification of results

Camera-ready copy due

Symposium in Taipei, Taiwan

\* Best Paper / Best Poster awards will be conferred during the symposium.
